## Program information & requirements

### Aim

Stichting Uitwisseling (referred to as SUSP/ Agency for Agricultural Exchange and Study Tours) aims to provide a cultural, educational and personal development experience for young people from all over the world. The Netherlands has a good reputation in agriculture and horticulture and, therefore, has a lot to offer to a trainee who intends to have a career in this sector.

### Placements

We have placements in dairy- (f.e. traditional, with robot equipment, or with cheese making), livestock- (f.e. pigs, cattle, poultry, sheep, or goats), mixed-, arable farming, horticultural companies (field vegetable production -regular or organic, shrub nursery, tree nursery, plants, flower bulbs, glasshouse -potted plants, cut flowers, or vegetables), and a few placements in equine, garden centers, or flower shops. If you wish a different type of placement, please feel free to contact us beforehand. Stichting Uitwisseling is prepared to investigate other placement opportunities.

Arrival throughout the year is possible. Most placements are available in the spring and summer. Some placements are available year-round. Finding placements can be more difficult in wintertime, depending on the requested placement for example. Hosts might offer training placements in a certain period of time, which might not correspond with the time that you would like to do your training

### Where do I live?

**Some trainees will live with their host/ employer and experience Dutch family life. Other trainees, mostly horticultural trainees, will live with another host family, or independently in an apartment or trailer, or they may share a separate house with other trainees or colleagues. Therefore it is important that every trainee is able to ride a bicycle and cook. We will determine your housing situation. It is not possible to live with a host family and cook yourself.**

### How much will I get paid?

**You receive in total € 775,00 net per month if you stay for at least 90 days. From this amount €167,50 is reserved for lodging, €195,- for meals and €412,50 for pocket money. You need to pay for your insurance yourself. In practice, if you live with a (host) family, you receive € 95,- net per week + board and lodging. If you live on your own, you receive € 95,- net per week + € 45,- to buy food, + housing. Your host will pay for the accommodation.**

## ANEXO 1

### DEPARTAMENTO DE CIENCIA Y PRODUCCIÓN AGROPECUARIA Carrera de Ingeniería Agronómica (CIA) - Zamorano Práctica Profesional EXTERNA

<b>DESCRIPCIÓN DE PRACTICA PROFESIONAL</b>			
<b>Nombre del Practicante y Código</b>
